APPLICABILITY OF MS-EXCEL IN FINANCIAL MANAGEMENT

It is literally impossible to enumerate all the possible applications Ms- Excel carries in commercial world.It can perform tasks ranging from the routine maintenance of financial statements to multivariate regression analysis to Monte Carlo simulations of various hedging strategies. It is not only useful for financial analysis, but for any type of quantitative analysis, whether our specialty is in marketing, management, engineering, statistics, or economics. With Excel, it is fairly a simple matter to build a spreadsheet to monitor our investment portfolio, do retirement planning, experiment with various mortgage options when buying a house, keep a mailing list, etc. The possibilities are, literally, endless. The more comfortable we become with the spreadsheet, the more valuable uses we will find. In light of all such importance, it becomes a necessity to be aware of applying theoretical concepts of financial management through MS-Excel which this workshop aims at.

The main motive of organising this workshop is to provide students a platform to learn and develop the skills of using Ms-Excel to solve the problems encountered in the area of financial management.

Eligibility of the Participants:

Students pursuing any P.G. course like M.Com. /M.B.A./M.Phil /Ph.D. (any stream) are eligible to attend the workshop.

Note: Students of 7th and 9th semester of integrated courses are also allowed.
